

# Fatima — Videographer & Designer

Fixed Teeth Solutions (FTS) | Week of 30 June – 4 July 2026 | Report to: Nikhil + Nadia

## FTS LAUNCH WEEK — CREATE COMPELLING CONTENT THAT CONVERTS

VIDEOS TO FILM  
**7+**

GRAPHICS TO CREATE  
**15+**

AD CREATIVES FOR  
RICHARD  
**9 files**

REPORT DEADLINE  
**Fri 4pm**

### MON 30 JUNE — Launch Week — FTS Video & Asset Blitz

#### ★ Shoot 60-sec 'What Is FTS?' explainer reel

This is your highest-priority deliverable of the week. Patients who don't understand the difference between FTS (same-day teeth) and regular dentures/implants don't book. A short, confident video closes that gap fast.

- Record at the clinic — white walls or dental chair backdrop works
- 60 seconds max. Hook in first 3 words. No long intro.
- Cover: What is FTS? → How long does it take? → Why choose us? → Call to action

*Opening line (say exactly): "If you've been told you're not suitable for implants — you need to hear this. Fixed Teeth in One Day is now available at [location]. Here's how it works."*

Why: Videos on landing pages increase conversion by up to 80%. Nikhil's Meta ads will use this footage as the primary creative asset. Weak video = weak ad performance.

- Film in landscape AND portrait (for YouTube/Meta and Instagram/TikTok)
- Use natural light or ring light — no harsh shadows on the dentist's face
- Record 3 takes. Keep the best. Edit same day if possible.

**PROOF** ~~PROOF~~ raw + edited video files to shared Google Drive folder > Videos > FTS-Explainer-Week1

##### Status (fill in daily)

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

#### ☐ Create 3 x FTS before/after static graphics (Canva or Photoshop)

Before/after visuals are consistently the highest-performing content type for dental practices on social media. Patients relate to transformation — seeing real results builds trust faster than any copy.

- Use actual patient photos where consent is given, or use stock where not yet available
- Design in both 1:1 (Instagram) and 9:16 (Stories/Reels cover) formats
- Include: before photo | after photo | "Fixed Teeth in 1 Day — from £7,997" text overlay
- Brand colours: use practice palette — ask Rohit if unsure what hex codes to use
- Add location tag (e.g. "Ashford" / "Barnet") so content can be geo-targeted

Why: Abhishek needs these to post Tue–Fri this week. Without visuals, social posts go out as text-only — engagement drops by 60%+.

**PROOF** ~~PROOF~~ 3 finished graphics to Drive > FTS-Assets > Static-Graphics with filename format: FTS\_BeforeAfter\_01.png

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Design FTS landing page hero banner (desktop + mobile versions)**

Rohit is building the FTS landing page this week. He needs a hero banner graphic to drop in — without it, the page launches with a placeholder and looks unprofessional to paid traffic arriving from Google/Meta ads.

- Desktop: 1440×600px. Mobile: 375×300px.
- Include: headline — "Same-Day Fixed Teeth — Smile by Tonight." Sub-headline: "Starts from £7,997 | 4 Locations"
- Background: lifestyle photo (smiling patient or dental setting) — not a stock dentist-in-mask photo
- CTA button area: leave space for Rohit to overlay "Book Free Consultation" button

Why: The banner sets the emotional tone of the landing page in under 2 seconds. If it looks cheap, the bounce rate will be high regardless of how good the ad copy is.

**PROOF** both banner files to Rohit via WhatsApp or Drive before 5pm today. Screenshot the Rohit confirmation.

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

**TUE 1 JULY — Ad Creatives + Google Review Graphics**

★ **Edit Monday's FTS explainer video — cut to :30 and :60 versions**

Richard's Meta ads need TWO lengths: 30-second for cold audience (scroll-stopping hook) and 60-second for warm retargeting (full story). Delivering both today means ads can go live Wednesday.

- :30 version: Keep hook + problem + solution + CTA. Cut all filler.
- :60 version: Full version from Monday. Add subtitles (80% of videos are watched on silent).
- Export as MP4, 1080p, H.264. File size under 100MB for Meta upload.
- Add subtitles using CapCut auto-caption or manual in Premiere. White text, black outline, bottom third of frame.

Why: Meta's algorithm rewards video completion rate. A :30 cut with a strong hook gets higher completion than a rambling :60 — gives the algorithm better signals to optimise delivery.

**PROOF** both edited versions to Drive > FTS-Assets > Video-Ads. Tag Richard and Nikhil.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Create 5 x FTS Google Review request graphics (one per location + generic)**

Charlotte, Sophie, Serena are all asking patients for Google Reviews this week. They need branded graphics to show patients on the iPad/phone — a visual prompt is far more persuasive than just saying "can you leave us a review?"

- Design: clean, friendly. "We'd love your feedback!" with Google star icon and QR code placeholder
- 5 versions: Ashford, Bexley, Barnet, Rochester, + 1 generic (no location)
- Size: 1080×1080 for iPad display and social sharing
- Include practice name and logo per location. Colour per location if practice has variations.
- Leave a blank box in the design for the QR code — Charlotte/Sophie/Serena will add their specific Google Review link via QR generator

Why: Practices with visual review-request tools see 2–3× higher review conversion than those who just verbally ask. Reviews directly affect Google Maps ranking — critical for Sachin's SEO work.

**PROOF** all 5 graphics to Drive > FTS-Assets > Review-Graphics. WhatsApp Charlotte, Sophie, Serena each their location file.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Shoot 3 x vertical 'mini-reels' (15-sec tip clips) for Abhishek to post**

Abhishek needs fresh content daily. These tip clips are fast to film, easy to watch, and perform well on Instagram/TikTok because they're informative, not just promotional.

- Topics: (1) "Is FTS right for me?" (2) "How long does FTS last?" (3) "What's the FTS procedure?"
- Format: talking-head style. Dentist or team member to camera. Plain background.
- 15 seconds each — tight, punchy. No waffle.
- Film all 3 back to back in one 20-minute session. Batch filming saves huge time.

Why: Social media algorithms heavily reward Reels over static posts — 3–5× more reach. Three clips give Abhishek Wed/Thu/Fri content without coming back to you.

**PROOF** raw 3 clips to Drive > FTS-Assets > Mini-Reels. Tag Abhishek with post dates suggested.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

**WED 2 JULY** — Testimonial Content + Email Newsletter Design

★ **Film 2 x patient video testimonials (with consent forms signed first)**

Social proof is the #1 trust-builder in high-ticket healthcare decisions. A real patient saying "I can eat properly again after years of struggling" is worth more than any ad copy we write.

- BEFORE filming: patient must sign written consent form. Do NOT film without it. Ask Charlotte/Sophie/Serena to pre-identify willing patients.
- Questions to ask on camera:
  1. "What was the problem that brought you to us?"
  2. "What were you worried about before the procedure?"
  3. "How do you feel now / what's changed for you?"
  4. "Would you recommend Fixed Teeth Solutions to someone else?"
- Keep each video 60–90 seconds. Conversational, not scripted-sounding.
- Film at the clinic. Dental chair backdrop ideal — reinforces authenticity.

Why: FTS costs £7,997–£14,997. Patients considering this treatment spend weeks researching. A real patient story shortens that decision cycle dramatically.

**PROOF** signed consent form scan + raw video to Drive > FTS-Assets > Patient-Testimonials. Send edited version to Nikhil and Abhishek.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Design weekly FTS email newsletter template (for Nadia's approval)**

Nadia sends weekly emails to the practice database. A branded, professional template makes every email look polished — and can be reused weekly, saving hours of design time.

- Sections to include:
  - Header: logo + "Fixed Teeth Solutions — [Month] Newsletter"
  - Hero image slot (Nadia will swap in each week)
  - Body text area (2–3 short paragraphs)
  - Patient testimonial quote block
  - CTA button: "Book Your Free Consultation" (red button, white text)
  - Footer: 4 location addresses, phone number, unsubscribe link
- Design in Canva (so Nadia can edit herself) or export as HTML if using Mailchimp
- Mobile-first: 600px wide max. Test it looks good on phone screen

Why: Nadia's email list is a warm audience — people who've already expressed interest. A well-designed email with a clear CTA converts far better than a generic text email.

**PROOF** Template file to Nadia and Nikhil for approval. Screenshot approval reply.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Create 4 x location-specific FTS social media story templates**

Abhishek and the front desk team need location-specific story templates for Instagram — quick to update, brand-consistent, and visually strong even when team members are creating content themselves.

- 4 versions: Ashford, Bexley, Barnet, Rochester
- Story size: 1080×1920px (9:16 vertical)
- Template should have: editable text area for offer/message, location name, practice logo, swipe-up CTA area
- Save as Canva template with edit access shared to Abhishek

Why: Consistent story branding across all 4 locations makes the practice look like a professional chain, not 4 disconnected practices. Trust increases with visual consistency.

**PROOF** Canva template links to Abhishek via WhatsApp. Screenshot confirmation he has access.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

**THU 3 JULY — Ad Creative Variations + Content Bank Build**

★ **Create 3 x alternative ad creative static graphics for A/B testing**

Richard is running Google Display and Meta ads this week. He needs creative variations to A/B test — same audience, different visuals. The winning creative will inform next week's budget allocation.

- Variation A: Price-led — "Fixed Teeth from £7,997 — Book Free Consultation"
- Variation B: Outcome-led — "Eat. Smile. Live. Fixed Teeth in One Day."
- Variation C: Urgency-led — "Limited July Slots — Don't Miss Out"
- All in 1200×628 (Facebook feed), 1080×1080 (Instagram) and 300×250 (Google Display)
- Brand consistent: same fonts, colours, logo placement across all 3

Why: Without A/B testing different creative angles, we can't know what message resonates with our audience. Testing now means Richard has data by Friday to optimise spend.

**PROOF** Upload all 9 image files (3 variations × 3 sizes) to Drive > FTS-Assets > Ad-Creatives-AB. Tag Richard.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Build 'Content Bank' folder structure in shared Drive for future weeks**

Currently assets are scattered. A structured content bank means anyone on the team can find what they need without messaging Fatima — saving hours per week and keeping campaigns moving fast.

- Create folder: Drive > FTS-Content-Bank
- Sub-folders:
  - Videos > Explainer / Testimonials / Mini-Reels / Ad-Cuts
  - Graphics > Static-Ads / Before-After / Review-Graphics / Story-Templates
  - Email > Newsletter-Templates / Banners
  - Logos-Fonts-Brand > [upload brand guide if exists]
- Move all this week's assets into the correct sub-folders
- Share folder access with: Nikhil, Richard, Abhishek, Nadia, Rohit

Why: Marketing velocity is directly linked to how fast creative assets are accessible. If Richard has to wait 2 hours for a graphic, the campaign pauses. The content bank removes that bottleneck.

**PROOF** Folder link in team WhatsApp group. Screenshot showing folder structure created.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Film 2-min 'Meet the Team' style video at one clinic location**

People buy from people they trust. A short, warm, behind-the-scenes video of the team builds emotional connection with prospective FTS patients who are anxious about such a major procedure.

- Film at whichever clinic has a willing dentist + receptionist available Thursday
- Format: Dentist introduces themselves, explains their FTS experience, 2 team members say a line each
- End with a wide shot of the practice + the line: "We're here to help you get your smile back."
- This does NOT need to be Hollywood quality — authentic is better than polished here

Why: Prospective FTS patients are often anxious and price-sensitive. Seeing real, friendly faces at the practice dramatically reduces that anxiety and increases booking intent.

**PROOF** Upload raw + edited video to Drive > Videos > Meet-The-Team. Send to Abhishek and Nadia for use next week.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

**FRI 4 JULY** — Week 1 Review + Week 2 Prep

★ **Submit creative performance report to Nikhil and Nadia by 4pm**

Every Friday by 4pm all team members report on their week. This is non-negotiable — it's how Gaurav and Nadia know whether the marketing effort is on track or needs redirecting.

Your report should cover:

- Videos filmed this week: [list titles]
- Graphics created this week: [count + types]
- Assets handed to Richard/Abhishek: [confirm which ones]
- Assets NOT completed + reason: [be honest — no penalty for honesty, only for silence]
- What you need from others next week (e.g. willing patients for testimonials, brand guide from Rohit)
- Week 2 proposed content plan: 3 bullets of what you'll create next week

Why: Without a creative output report, Nikhil can't plan ad creative rotations and Nadia can't update Gaurav on campaign readiness. This closes the accountability loop.

**PROOF** Enshot or PDF of report sent to Nikhil + Nadia by 4pm Friday.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Edit and finalise all testimonial/mini-reel videos from this week**

Any videos filmed but not yet edited need to be wrapped up today so they're ready for Abhishek to schedule next week. Unedited footage in a folder is wasted effort.

- Colour grade: basic correction only — brightness, contrast, colour temp
- Add subtitles to ALL videos (not optional — 80% of social video is watched on mute)
- Add brief intro graphic: practice logo + "Fixed Teeth Solutions" text for 2 seconds
- Export: MP4, 1080p, under 100MB each

Why: If edited videos aren't in Drive by Friday EOD, Abhishek can't schedule them for next week — breaking the content calendar and leaving paid ads without supporting organic content.

**PROOF** Edited videos in Drive folders by 5pm Friday. Send Abhishek a list of what's ready.

**Status (fill in daily)**

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

☐ **Plan Week 2 content calendar — share with Nikhil for approval**

Week 2 content needs to be planned now so there are no gaps. Rushed content looks rushed. Planned content looks professional.

- Map out: Mon–Fri next week, what you'll film/design each day
- Consider: what ad creatives does Richard need? What social content does Abhishek need daily?
- Think: do you need patient consent lined up in advance? Book those conversations now via Charlotte/Sophie/Serena
- Format: simple table — Day | Content Type | Format | For (Abhishek/Richard/Nadia) | Status

Why: A content calendar keeps the entire marketing team in sync. Without it, everyone's waiting on everyone else. With it, the team runs like a production machine.

**PROOF** Week 2 content calendar to Nikhil via WhatsApp or Google Sheets by 4pm Friday.

**Status (fill in daily)**

☐ Done   ☐ In Progress   ☐ Not Done

If not done — Reason: \_\_\_\_\_

Next step: \_\_\_\_\_

**FATIMA'S GOLDEN RULE:** Every asset you create this week is fuel for Richard's ads, Abhishek's posts, and Nadia's emails. Without your output, the entire marketing machine stalls. Film it. Design it. Deliver it. Everything in Drive by the agreed time.

Questions? → Nikhil is your first point of contact. For patient consent → Charlotte/Sophie/Serena. For brand/tech → Rohit.
