

Nadia — Chief Operating Officer (COO)

Fixed Teeth Solutions (FTS) | Week of 30 June – 4 July 2026 | Report to: Gaurav (dr.gaurav.m@gmail.com)

FTS LAUNCH WEEK — YOU SET THE PACE, THE TEAM FOLLOWS YOUR LEAD

FTS LEADS TARGET
12+

CONSULTATIONS TARGET
4+

REPORT TO GAURAV
Fri 4pm

3-MIN CALL RULE
ENFORCED

MON 30 JUNE — Launch Week Kickoff — Set the Standard

★ Conduct 9am FTS Launch Week briefing with all 10 team members

This is the single most important thing you do today. If the team doesn't understand what's expected of them this week, the entire FTS campaign launch will be fragmented. Your job is to set clarity, urgency, and accountability from Day 1.

Run the briefing in this order:

- The goal (2 min):** "This week we are launching Fixed Teeth Solutions properly across all 4 locations. Every one of you has a specific role. This is not business as usual."
- The prize (1 min):** "FTS cases are £7,997–£14,997. One case per week per location = transformational revenue. That's what we're building towards."
- The rules (2 min):**
 - 3-minute lead callback — no exceptions. Rohit/Nikhil will confirm auto-SMS is live.
 - Every task needs proof. No proof = not done.
 - Friday 4pm KPI report — non-negotiable for everyone.
- Round the table (5 min):** Each person says their #1 deliverable this week. You confirm it or correct it.

Why: Without a briefing, people assume last week's pace is fine. With a briefing, everyone knows this week matters. Your tone sets the team's tone.

PROOF: of team assembled OR WhatsApp group message confirming briefing completed + attendee list.

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

★ Confirm Rohit's GHL 3-minute auto-SMS is LIVE and tested by 10am

The 3-minute rule only works if the automation is actually running. Before any ads go live (Richard starts today), you must personally confirm the auto-SMS fires correctly. This is operational infrastructure, not a nice-to-have.

- Ask Rohit to show you the GHL workflow live on screen — see it with your own eyes
- Or: submit a test lead via the FTS landing page/form and watch the SMS arrive within 3 minutes
- Confirm the SMS message reads correctly (FTS-specific, not generic dental enquiry text)
- Check: does it include the booking link? Does it reference Fixed Teeth Solutions by name?

If SMS not live: "Rohit, this is blocking Richard's ad launch today. What's the earliest you can have this live — give me a time by 10am."

Why: If Richard's ads generate leads but no one calls within 3 minutes AND the auto-SMS isn't firing, those leads go cold. Every wasted lead at this price point is a potential £10k+ lost.

PROOF: screenshot of GHL workflow showing ACTIVE status + screenshot of test SMS received on your phone.

If not done — Reason: _____
Next step: _____

☐ **Send FTS weekly target email to Gaurav by 11am**

Gaurav needs to know what the team is aiming for this week before it starts — not at the end. This is your executive summary of launch week goals.

Email structure:

- Subject: "FTS Launch Week — Targets & Team Deployment | Week of 30 June"
- Para 1: Who is doing what this week (one line per person, their main deliverable)
- Para 2: KPIs we're tracking — leads generated, consultations booked, ads live Y/N, Google Reviews collected
- Para 3: What you need from Gaurav (if anything) — decisions pending, sign-offs needed
- Keep it under 300 words. Gaurav is busy. No waffle.

Why: Gaurav should never be surprised by what the team is doing. Weekly target emails keep him in the loop and give him a chance to redirect if priorities shift at the top level.

PROOF Enshot of email sent to dr.gaurav.m@gmail.com by 11am Monday.

TUE 1 JULY — Pipeline Quality Control + Patient Journey Audit

★ **Audit GHL FTS pipeline — check every lead from last 30 days for correct stage**

If leads are sitting in the wrong pipeline stage, Nikhil and the front desk can't accurately report on the funnel. A stale pipeline gives false data — you make bad decisions on fake numbers.

How to audit:

- Open GHL → Pipelines → Fixed Teeth Solutions
- Go through each column (New Lead → Contacted → Consultation Booked → Consultation Done → Treatment Accepted → Treatment Booked → Won)
- For each lead: when was it last updated? Is it in the right stage? Is there a note explaining the current status?
- Move stale leads (no update in 7+ days) to a "Needs Action" tag
- Identify: how many leads are in Contacted but no consultation booked? That's the gap to close.

Why: The pipeline is only useful if it's accurate. Bad pipeline hygiene means Nikhil's KPI reports are wrong, Richard doesn't know which ad source converts, and you can't tell Gaurav the real numbers on Friday.

PROOF Enshot of GHL FTS pipeline with all stages visible + note of any leads flagged for action.

Status (fill in daily)

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

☐ **Call 5 unconverted FTS leads personally to offer consultation**

There are almost certainly leads in the pipeline who've gone cold but aren't truly lost. A direct call from you — as COO, not a receptionist — signals the practice takes them seriously. This alone can resurrect 1–2 consultations.

- Pick 5 leads who enquired in the last 30 days but haven't booked

- Do NOT assign this to front desk — make these calls yourself today

Opening: "Hi [name], this is Nadia, I'm the Operations Director at [Practice]. I noticed you enquired about our Fixed Teeth Solutions — I wanted to reach out personally. Do you have 2 minutes? I'd love to answer any questions you have and see if we can get you in for a no-obligation consultation."

- Log outcome in GHL after each call: booked / not ready / wrong number / voicemail left
- If voicemail: leave a message AND send a follow-up SMS (via GHL)

Why: Every unconverted lead cost money to acquire. A 2-minute phone call can turn that sunk cost into a £10k+ case. If even 1 of 5 books, the ROI on this call session is enormous.

PROOF Screenshot showing 5 leads updated with call notes today.

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

☐ **Review Richard's live ad campaigns — check spend, clicks, impressions**

You don't manage ads, but you do manage the people who manage ads. Knowing the numbers means you can ask the right questions and catch issues before they become expensive.

- Ask Richard to share a 24-hour screenshot of Google Ads and Meta Ads dashboards
- Check: Is spend tracking to budget? Any ads disapproved? What's the CTR?
- For Google: CTR above 3% = good. Below 1% = headline problem. Flag to Nikhil.
- For Meta: CPL (cost per lead) target under £30 for FTS. Above £60 = creative not working.

Why: Ad spend without oversight is a leak. Catching a misconfigured campaign on Day 2 saves potentially hundreds of pounds. This is part of your operational oversight remit.

PROOF Screenshot of Richard's ad dashboard stats + your written note to Nikhil of any flags.

If not done — Reason: _____

Next step: _____

WED 2 JULY — Consultation-to-Treatment Conversion Focus

★ **Review this week's consultation bookings — are targets being hit?**

By midweek you should have early data on whether the FTS launch is generating consultation bookings. Wednesday is your course-correction window — if bookings are low, you can act Thursday/Friday. Wait until Friday and it's too late.

- Pull consultation bookings from all 4 locations for Mon–Wed
- Target: at least 2–3 FTS consultations booked across all locations by Wednesday
- If below target: identify why. Is it a lead volume problem (ads not working)? A conversion problem (front desk not converting calls)? A booking problem (no slots available)?
- Each problem has a different fix. Don't assume — diagnose first.

Why: You have two days to fix a low-booking week before Friday's report to Gaurav. Wednesday is the last moment where a targeted intervention (extra calls, revised script, new offer) can still move the needle this week.

PROOF Screenshot of consultation bookings from GHL or booking system. Write your diagnosis (1 sentence) below it.

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____
Next step: _____

☐ Run 30-min consultation conversion training with Charlotte, Sophie, Serena

Front desk staff are the last link between a lead and a booked consultation. If their call-handling isn't confident and structured, leads who could book don't. 30 minutes of targeted coaching can make a measurable difference this week.

Run it as a role-play:

1. You play the hesitant lead. Each of them takes a turn as the receptionist.
2. Common objections to handle:
 - "It's too expensive." → "I completely understand. The consultation is free and there's no obligation — our dentist can talk you through all the options, including payment plans."
 - "I want to think about it." → "Of course. Can I book you a slot and you can always cancel if needed? We have [day/time] available."
 - "I've had bad experiences before." → "That's really common for people who come to us — let me tell you how our process is different."
3. After role-play: discuss what worked, what felt awkward, what they'll do differently

Why: Scripts without practice are just theory. Role-play ingrains the right words so they come naturally when it's a real, anxious patient on the phone.

PROOF Form training happened via WhatsApp to Gaurav. Note: who attended, what was covered.

Status (fill in daily)

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

☐ Send mid-week check-in to all 10 team members

Wednesday is your accountability pulse check. You're not micromanaging — you're removing blockers and catching slippage early enough to fix it.

Message to send (WhatsApp or email):

"FTS midweek check-in Quick pulse — where are you with your Mon/Tue tasks? Reply with: Done ✓ | In Progress — finishing by [day] | Stuck — need help with [X]. I want to make sure we finish the week strong. Any blockers, message me now and I'll help unblock."

- Follow up personally within 1 hour with anyone who doesn't reply
- Log any blockers reported and resolve or escalate same day

Why: Silence mid-week usually means someone is stuck but embarrassed to say so. Your message gives them a safe, low-friction way to flag it. Unresolved blockers become Friday's excuses.

PROOF Screenshot of WhatsApp message sent + replies received. Note any blockers identified and how resolved.

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

THU 3 JULY — Patient Experience Audit + Finance Check

★ Visit one clinic location — observe FTS patient journey end-to-end

You can't manage what you don't see. A physical visit — even 2 hours — gives you ground truth about how FTS is actually being presented to patients, which no dashboard can show you.

What to observe:

- How does reception greet walk-ins who ask about FTS? Is the team confident?
- Is FTS marketing visible in the waiting room? (Posters, iPad display, leaflets)
- When a patient is told the price, what happens? Does the receptionist handle the reaction well?
- Is the 3-minute call-back happening when leads come in while you're there?
- Talk to 1–2 team members informally: "How's the FTS launch feeling? Any obstacles?"

Why: The gap between what a team member says they do and what they actually do is often significant. A surprise visit (or even a scheduled one) reveals the truth. You can't fix problems you can't see.

PROOF: taken at the clinic during visit + 3 bullet written observations with actions to take.

Status (fill in daily)

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

☐ Check FTS payment plan / finance options are confirmed and documented

FTS costs £7,997–£14,997. Most patients can't pay this outright. If the practice doesn't have a clear, communicated finance option, a proportion of leads who want treatment won't proceed. That's lost revenue that's easy to recover.

- Confirm: is there a finance/payment plan option available at all 4 locations?
- If yes: is it communicated on the website, in the consultation, by front desk?
- If no: raise with Gaurav immediately — this is a barrier to conversion that needs solving this week
- Confirm: what is the monthly payment for £7,997 over 24 months, 36 months, 60 months? Front desk must know this off the top of their heads.

Brief to Charlotte/Sophie/Serena: "When a patient asks about cost, say: 'Yes, it's an investment — and we do offer flexible payment plans starting from around £X per month. Would it help to go through the options with you during your free consultation?'"

Why: Finance objections are the #1 reason patients don't proceed with high-ticket treatment. Removing the friction of 'I can't afford it upfront' converts patients who would otherwise walk away.

PROOF: note confirming finance option status + screenshot of where it's communicated (website/brochure/verbal script).

Status (fill in daily)

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

☐ Compile week's leads and consultations into FTS tracker spreadsheet

Your Friday report to Gaurav needs real numbers. Thursday is the day to gather all the data so Friday is just analysis and sending — not frantic data collection.

- Open FTS Tracker (create in Google Sheets if doesn't exist)
- Columns: Lead Name | Source (Google/Meta/Walk-in/Referral) | Date Enquired | Called Within 3 Min (Y/N) | Consultation Booked (Y/N) | Consultation Date | Treatment Accepted (Y/N) | Value (£)
- Fill in all leads from this week across all 4 locations
- Total up: how many leads? How many consultations? How many treatments?

Why: Without a tracker, your Friday report is anecdote ("I think we got some leads"). With a tracker, it's fact ("We received 12 leads, booked 4 consultations, had 1 treatment accepted at £9,997"). Gaurav needs facts.

PROOF Enshot of FTS tracker spreadsheet with all data entered for Mon–Thu.

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

FRI 4 JULY — Week 1 Reporting + Week 2 Strategy

★ **Send comprehensive Week 1 FTS report to Gaurav by 4pm**

This is your most important deliverable of the week. Everything else feeds into this. Gaurav needs to know: did the launch work? What's the ROI so far? What happens next week?

Report structure (email to dr.gaurav.m@gmail.com):

- **Subject:** "FTS Week 1 Report — [Date] | Nadia"
- **Section 1 — Lead Generation:** Total leads this week | By source (Google/Meta/Organic) | By location
- **Section 2 — Conversion:** Leads called within 3 min (% rate) | Consultations booked | Consultations completed | Treatments accepted | Revenue value
- **Section 3 — Marketing:** Ads live? (Y/N + which) | Website landing page live? | Google Reviews collected this week
- **Section 4 — Team Performance:** Who completed their tasks? Any gaps? Any stars?
- **Section 5 — Week 2 Plan:** 3 priorities for next week based on this week's data

Why: This report IS the product of your role as COO. It tells Gaurav whether the business is growing, where to invest more, and where to fix problems. A clear, data-driven report earns trust. A vague report erodes it.

PROOF Enshot of email sent to Gaurav by 4pm Friday with all 5 sections included.

Status (fill in daily)

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

★ **Collect all 10 team members' Friday KPI reports by 4pm**

You cannot write your report to Gaurav without the team's input. If someone doesn't submit by 4pm, you chase them — not after 4pm, but before. Set a 3:30pm reminder to follow up with anyone who hasn't sent.

- Send a reminder message at 2pm: "Just a reminder — KPI reports due by 4pm today. Please send to me AND Gaurav (dr.gaurav.m@gmail.com). Thanks."
- By 3:30pm: check who has submitted and who hasn't. Chase directly anyone missing.
- By 4pm: you should have reports from Charlotte, Sophie, Serena, Nikhil, Richard, Sachin, Rohit, Abhishek, Fatima.
- If someone fails to submit: log it in your report to Gaurav — not to punish, but for accountability visibility.

Why: If you don't enforce the 4pm deadline, it drifts to Monday, then next week, then never. One missed deadline tolerated = a signal to the whole team that deadlines are optional.

PROOF Enshot of all 9 KPI reports received in WhatsApp/email before 4pm. List who submitted and who didn't.

Status (fill in daily)

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

☐ **Brief Gaurav verbally on Week 1 highlights and Week 2 strategy (10 min call)**

The written report captures the data. A short call with Gaurav captures the context, nuance, and any decisions that need his input. This also keeps you close to him operationally — he should never feel out of the loop.

- Prepare 3 talking points before the call:
 1. The single biggest win from this week
 2. The single biggest problem that needs his input/decision
 3. Your specific recommendation for Week 2 priority #1
- Keep it under 10 minutes. Come with answers, not just questions.
- End with: "Anything you need from me before Monday?"

Why: A COO who only communicates via written report is less effective than one who can translate data into clear verbal strategy. The call reinforces your leadership presence and keeps decision-making fast.

PROOF your 3 talking points below. Screenshot/note confirming call completed with Gaurav.

Status (fill in daily)

☐ Done ☐ In Progress ☐ Not Done

If not done — Reason: _____

Next step: _____

NADIA'S MANDATE THIS WEEK: You are the engine that keeps all 9 other team members on track. Your job is to remove blockers, enforce deadlines, surface problems early, and give Gaurav a clear picture of exactly where the FTS launch stands. The team looks to you for the standard. Set it high from Monday morning and hold it all week.

ESCALATE TO GAURAV IF: 3-min auto-SMS is not live by Monday 10am | Consultation bookings are zero by Wednesday | Any team member refuses to submit KPI report | Finance options are not available at a location.
